## Projects

### Leveraging Deep Learning in Carbohydrate Tracking and Diabetes Management for Health-Conscious Individuals 08/2025

Undergraduate Research 1 and 2 Project

- **Role:** Full Stack Developer, Researcher, Project Manager
- **Description:** Led the end-to-end development of CarboTrackr, a research-driven AI-powered mobile health application designed to automate carbohydrate tracking and improve nutritional self-management for health-conscious adults. The system integrates deep learning-based food recognition, automated carbohydrate estimation, and behaviorally grounded design principles to reduce manual logging burden while maintaining usability, accuracy, and system reliability. The application was developed following Agile methodology and evaluated using ISO/IEC 25010 software quality standards to ensure functional suitability, performance efficiency, usability, and security
- **Key Contributions:**
  - Designed the overall system architecture, relational database schema, and corresponding Entity-Relationship Diagram
  - Initialized and structured project directory of backend and frontend services following microservices architecture
  - Built backend using ExpressJS
  - Developed cross-platform mobile frontend using React Native and Expo
  - Managed project coordination and task delegation
- **Tech Stack:** Git, NodeJS, ExpressJS, React Native, Expo, Python, Neon Postgres, Clerk Auth, Render, Third-Party APIs
- **Tools:** JetBrains WebStorm, Postman, GitHub, Amazon SageMaker
- **Repository:** [github.com/CarboTrackr2025](https://github.com/CarboTrackr2025) 🔗

### Redesigning Yahoo Mail (Mobile App)

11//2024 – 11/2024

Human Computer Interaction School Project

- **Role:** UI/UX Designer
- **Description:** Conducted a comprehensive UI/UX redesign of the Yahoo Mail mobile app
- **Key Achievements:**
  - Applied Nielsen's 10 Heuristic Principles to evaluate interface issues
  - Performed persona-based analysis to define target user behaviors
  - Conducted Red Route analysis to prioritize high-frequency user tasks
  - Developed high-fidelity prototype in Figma
- **Tech Stack:** Figma, Canva
- **Canva Presentation:** [canva.com/design/DAG22-oEBc0/NA0E8QyFJ2f2XrJ-ah\\_7Ow/edit](https://canva.com/design/DAG22-oEBc0/NA0E8QyFJ2f2XrJ-ah_7Ow/edit) 🔗

### athAIIna

11/2024 – 05/2025

Software Engineering 1 and 2 School Project

- **Role:** Full-stack developer and project manager
- **Description:** Developed a RESTful API and AI-powered flashcard application to support knowledge assessment and progress tracking modules
- **Key Contributions:**
  - Designed the overall system architecture, relational database schema, and corresponding Entity-Relationship Diagram (ERD).
  - Initialized and structured the project directory for backend and frontend services following a microservices architecture
  - Built backend using Django REST Framework
  - Developed frontend using Vue.js
  - Containerized backend services using Docker
  - Implemented Redis Caching
  - Managed project coordination and task delegation
- **Tech Stack:** Django, Django REST Framework, Vue.js, Docker, Redis, MySQL, Git
- **Tools:** GitHub, JetBrains WebStorm and PyCharm, Visual Studio Code, Docker Desktop, Render, Cloudflare, XAMPP, Notion
